Valoyi Community Centre
Nwamitwa, rural Limpopo

We offer holistic support to vulnerable children, their caregivers, to vulnerable households and to young unemployed school-leavers.

It is a resource to the community, a welcoming and convivial base where Nwamitwa's children and young people – and their caregivers – can look forward to and prepare for a better future.

Our Vision is of a healthy and happy rural community, able to secure nutritional, economic and educational wellbeing.

Valoyi Traditional Authority Trust

Valoyi Community Centre and programmes
Nwamitwa
Limpopo

The Centre offers a range of programmes

Infant care, preschool and afterschool care

The Valoyi Community Centre caters for vulnerable children: babies, preschoolers and schoolchildren who come to the Centre in the afternoons and during school holidays. These older children are helped with their school work and engage in various activities arranged for them.

Mothers' Programme

HIV+ women and grannies are referred to the Centre for nutritional and psycho-social support. They are given two healthy meals a day and are invited to grow their own vegetables in the Centre's food garden for their households or for sale. When we are given orders, the mothers also sew, embroider and bead.

Fit for Life, Fit for Work programme

Nwamitwa's unemployed school-leavers have five weeks of all-day, every-day work on themselves to build confidence and a work ethic. They are helped to become work-ready and to find either paid employment, stipended learnerships or a bursary for bona fide tertiary studies. We help enterprising young graduates start their own small businesses.

Construction programme

22 Fit for Life, Fit for Work graduates entered a construction skills learnership, training to be qualified construction workers and building the Centre at the same time.

Integrated Agriculture and Aquaculture Project

22 Fit for Life, Fit for Work graduates entered an agricultural skills learnership, training to be qualified agriculturalists and developing an organic farm at the same time. Young graduates of this learnership are now moving on to small farms of their own. We hope to build a much-needed class of competent and confident young black farmers.

Home-Based Care programme

22 home-based carers visit vulnerable households in Nwamitwa's 32 villages, bringing psycho-social, medical and nutritional support.
